

Enhancing the Fishing Industry's Use of Sidestreams

Issortarfimmut 1
3905 Nuussuaq
Greenland

What does it take for the fishing industry to make greater use of sidestreams and support the implementation of Greenland's Self-Sufficiency Strategy 2025-2030?

[Register here by 10 June](#)

Join us at the workshop, where we will focus on the entire value chain, sustainable biomass production and processing, product development, circular use, upcycling for new applications, how different end products reach customers and the need to create economically sustainable businesses.

As part of the BlueRev partnership, we will present tools developed with input from the Greenlandic ecosystem to facilitate implementation. Discover these tools and see examples of their use in real cases.

Participate to gain insights into your own and others' value chains and contribute to the development of new value chains and collaborations.

We welcome participation from the fishing industry, food producers, food service providers (restaurants, hotels, public kitchens, etc.), retail, entrepreneurs, organizations involved in local food development, knowledge institutions, and anyone else with valuable input for today's discussions.

PROGRAMME

WELCOME AND INTRODUCTION

Learnings from the pilot regions and recommendations

BlueRev tools:

- The BlueRev Sustainable Business Model Canvas
- Canvas for development of governance recommendations
- Booklet – guidelines for small businesses on how to communicate

LUNCH

Presentation of cases

Greenland's Self-Sufficiency Strategy 2025-2030

Workshop: How can you utilize the available sidestreams from Greenland's biobased economy, and which collaboration partners are essential for developing a successful value chain? Meet potential partners at the workshop and explore opportunities for your future business.

Funding opportunities

WRAP UP OF THE DAY!
